Marius-Nicușor Pântea
Software Developer

Computer Science student with skills in Java, Spring, C/C++, and MySQL. Looking for opportunities to apply my skills in software development.

Education

Computer Science, The Faculty of Automation and Computers
October 2022 - Present

Hobbies

Passionate about competitive gaming, following football leagues, and exploring innovative software technologies in my spare time.

Expense Management System – A project that uses React, Java . Spring Boot, and MySQL for database management.
https://github.com/Marius1608/Expense-Management

Polyclinic Management System – A computer system designed for efficient management of activities within a polyclinic chain. Built using Java, JavaFX, and MySQL.
https://github.com/Marius1608/Project-Polyclinics

MedCare-App-Web – Developed in Java, Spring Boot, and TypeScript/React for comprehensive healthcare management with appointment scheduling and reporting features
https://github.com/Marius1608/MedCare-App-Web

Various Algorithm Implementations – Developed using C and C++ for problem-solving and computational tasks.
https://github.com/Marius1608/Fundamental-Algorithms

Operating Systems Tasks – Worked on file systems, processes, threads, and inter-process communication mechanisms on Linux.
https://github.com/Marius1608/Operating-Systems

Interactive Football Simulator – A 3D football simulation developed using modern graphics technologies, with OpenGL/C++ as the main graphics API.
https://github.com/Marius1608/OpenGL
